

Emsisoft Anti-Malware

Full protection for stationary computers that are always behind a hardware- or software-firewall (Windows FW, NAT-router, etc.).

- Dual Engine
- 3-Layer Protection

FINDING AND REMOVING MALWARE

		Tech Remarks
Virus- & Malware Scanning	Dual-Engine scanner including two major virus scan technologies to detect all types of malicious software, such as viruses, trojans, bots, ransomware, spyware, keyloggers, etc.	Emsisoft (A) & Bitdefender (B).
Fast Scanning	Emsisoft scans faster with two engines than most products do with just one. The new Version 10 comes with a 97% faster scan speed!	Combination of scan engines at lowest possible level; signatures for double-detections are avoided for memory use optimization.
Rootkit Detection	Scans boot sectors and finds hidden rootkits in the operating system.	Uses direct disk access mode to read files in a raw format from harddisk.
PUPs Detection	Optionally alerts user of potentially unwanted programs (PUPs) that overload the computer with resource-wasting applications.	Mostly browser toolbars, adware, system manipulators.
Advanced Infection Cleaning	Smart routines that ensure safe cleaning, without risking the stability of the computer.	70+ autorun/loading points, restores default values if needed.

PREVENTING NEW INFECTIONS

		Tech Remarks
Award-Winning Real-Time Protection From Infections	Three-layered system including Surf Protection, File Guard and Behavior Blocker.	Layers are not interchangeable but instead complement each other.
Layer 1: Surf Protection	Blocks access to known fraudulent and dangerous websites.	Fraudulent as in stealing passwords (phishing) and dangerous as in spreading malware downloads.
Layer 2: File Guard	Scans all downloaded and started files using millions of malware signatures.	3 modes available: Scan on execution (program starts only); Additionally scan all newly created and modified files; Additionally scan all files when they are read.
Layer 3: Behavior Blocker	Finds brand new malware by monitoring the behavior of all running programs.	Uses live cloud-verification with the Emsisoft Anti-Malware Network database.
Online Banking Protection	Blocks banking trojans that try to wipe your bank account.	A specialized feature of the Behavior Blocker that detects process manipulations of the browser.
Phishing- and Keylogger-Protection	Prevents stolen passwords for all sorts of online accounts.	A combined feature of all three protection layers.
Exploit- and System-Manipulation-Prevention	Ensures data integrity and validity of active programs.	Combined detection of code injectors, exe-patchers, hidden rootkits, autoruns, hosts changers, browser settings changers, group policy changers and invisible installers.
Settings for Advanced Users	Highly customizable protection parameters for experts while remaining easy to maintain for beginners.	Plenty of available settings, but defaults are best for most users.

CONVENIENCE

Tech Remarks

Game Mode	Suppresses all notification popups and online updates while playing games.	One-click activation via tray menu.
Automatic Updates	Detection signatures are updated at least 24 times a day.	Protection against more than 300,000 new threats and bad websites is added every single day.
Scheduled Scans	Optional scan of the whole system at scheduled times.	E.g. scan everything on Friday evening after work.
Emsisoft Anti-Malware Network	Optional live cloud-verification of detected threats to sharpen detection and avoid false alerts.	www.isthisfilesafe.com database with more than 100 million known threats.
Quarantine	Keeps detected objects in a safe, encrypted locker for further investigation before they are finally removed.	Also allows you to submit files to Emsisoft for analysis.
Advanced Logging	Keeps records of all activities from real-time protection, scanner, quarantine and updates.	Helpful for support to reproduce situations.
Notifications	Information when e.g. a dangerous website was blocked or a downloaded file was automatically quarantined.	Huge advantage over Windows Defender which does not notify about anything.
Permissions	Set an administrator password or restrict individual users from accessing specific features of the software.	Includes support for Active Directory users and groups; helpful for businesses.
Easy Interface	You don't need to be an expert to stay protected with Emsisoft, but experts love it too.	A beautiful, modern, simple and easy to understand user interface.
Privacy Conscious	This software does not send any user profile or private data to some cloud server.	Most competitor programs do - See AV-Comparatives report: emsi.at/priv
Commandline Scanner	The included Emsisoft Commandline Scanner is known to be one of the most sophisticated and flexible command line interfaces around.	Providing top performance with frequent scans, featuring all functions of the GUI version.
Certified protection	Emsisoft Anti-Malware has earned multiple VB100 awards, multiple MRG-Effitas zero-day protection victories and consistently shows in the upper quarter of all ongoing AV-Comparatives Real World protection and detection tests.	See www.anti-malware-reviews.com for latest reviews and awards.

CONSUMER BENEFITS

Tech Remarks

Malware Removal Guarantee	Dedicated malware experts will help you cleanse your system of nasty infections.	This service is offered at no charge and does not oblige you to purchase products in any way.
Technology Guarantee	You receive new software versions at no cost within the licensed period, just by using the built-in update feature.	Emsisoft doesn't just sell software – but is committed to keeping your computer clean.
Customer Focus	Emsisoft is convinced that treating their customers in an honest and respectful manner is the foundation of sustainable business.	Most vendors either reply late, are not helpful or just use canned texts sent from an India-based support center.
Personal Assistance	24/7 quick and helpful replies (24h max) directly from specially trained removal staff.	Email: support@emsisoft.com Forum: support.emsisoft.com

System Requirements

- OS Windows 7, 8, 8.1, 10
The latest service packs and updates are required.
- HDD ~250 MB free space
- RAM Minimum 1 GB, ideal 2 GB+
- CPU Any x68 or x64

Important: Emsisoft Anti-Malware can not be installed on Windows Servers. Please consider Emsisoft Anti-Malware for Server as a suitable alternative.
